# PRIVACY

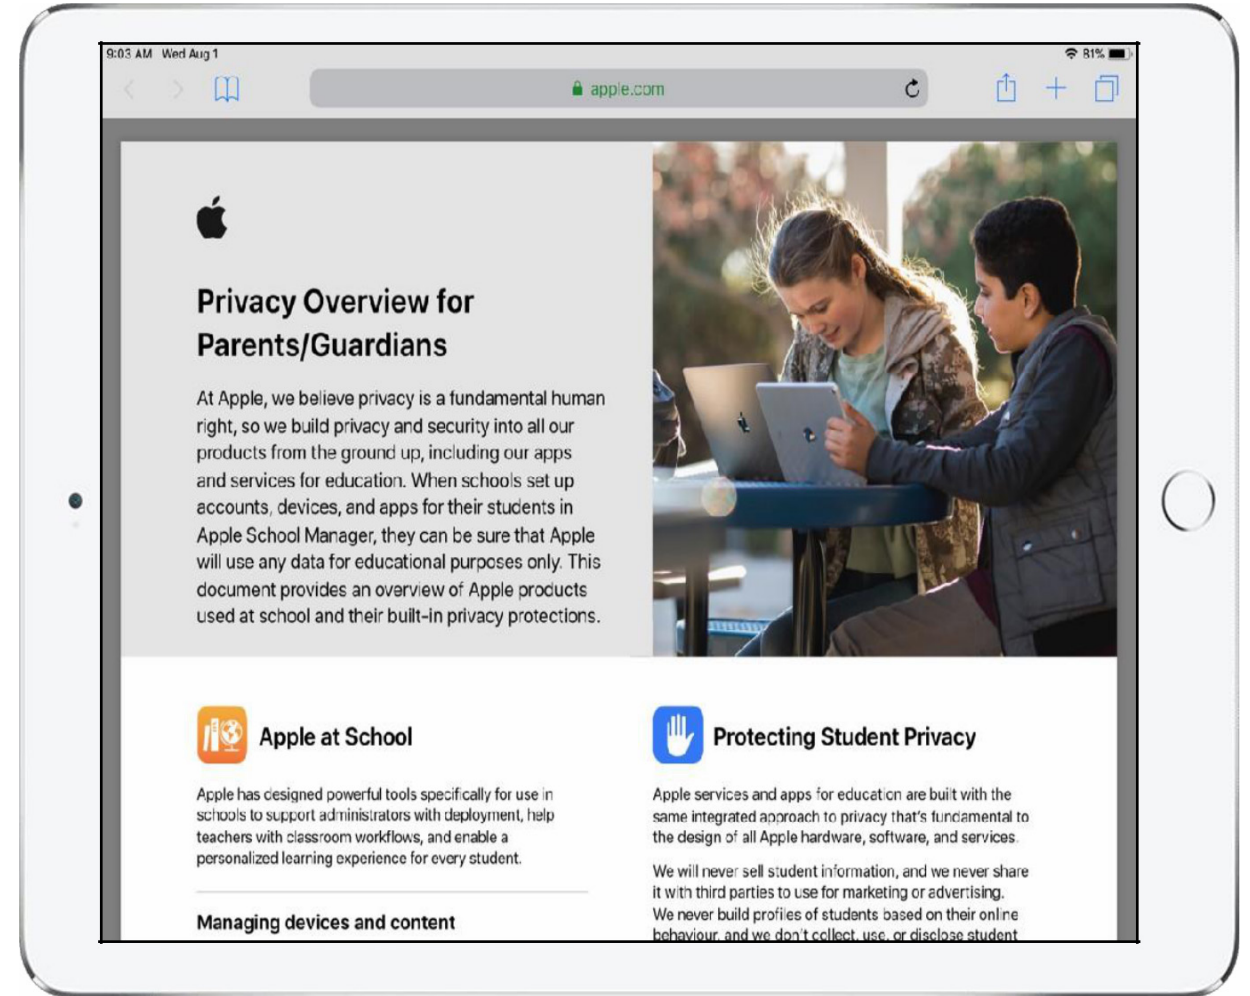

## Our Pledge

We are committed to protecting your child's information. We are proud to partner with a company like Apple, that vows to never sell or share student information.

## Why no App store?

Using **Self-Service** for app deployment allows us to purchase and deliver apps that will enhance their learning experience and keep your child's information safe.

# PRIVACY – Information

## What Information is shared?

Within the classroom environment, teachers want to make the best decisions for each individual student in their class. An app like Canvas allows students and teachers to feel protected while they to share materials, review progress, provide feedback and personalize learning. No student data is shared when using Canvas.

## Student Accounts

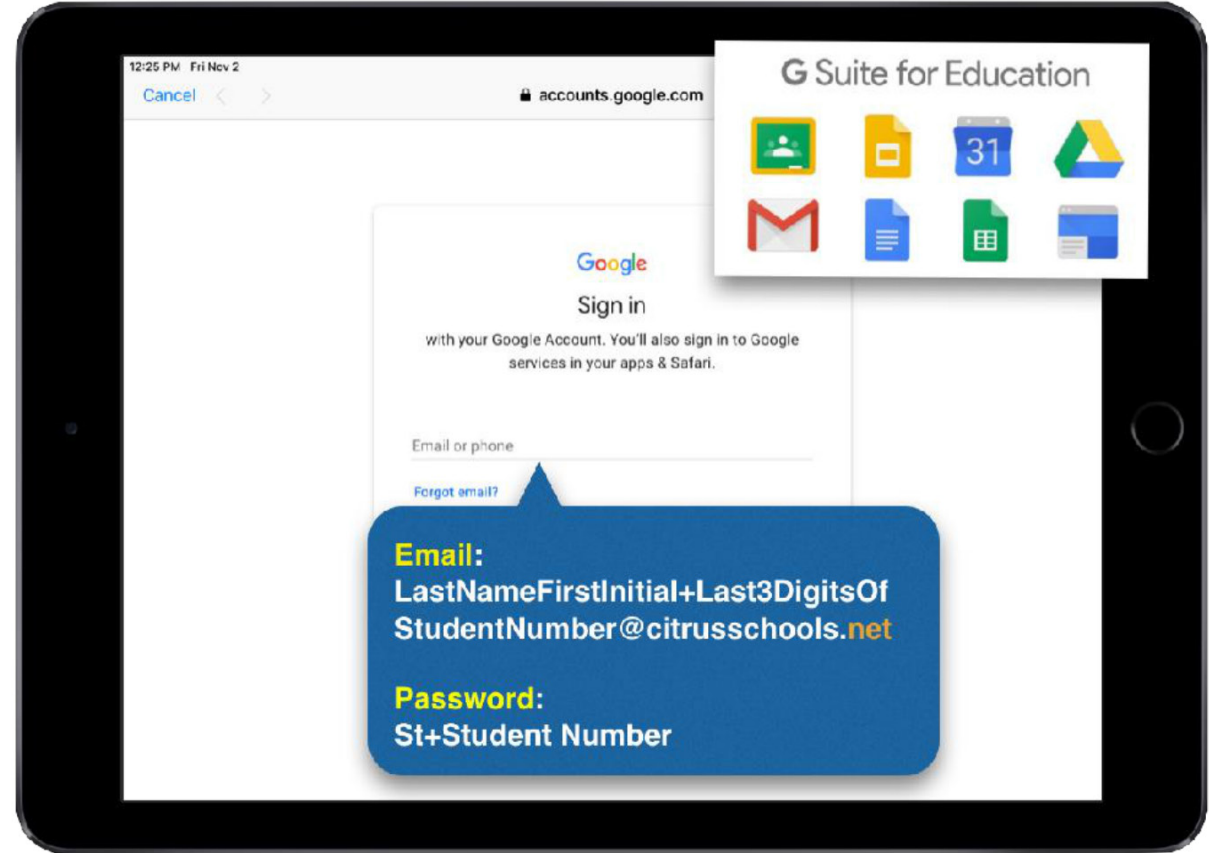

Students enrolled in Citrus County Schools have the privilege of using Google and Microsoft's Suite of tools; G Suite for EDU and Microsoft 365 respectively. These tools have layers of security for our students and gives them access to Microsoft and Google tools on their device and at home. These accounts are created for students at the district level and remain with students throughout their tenure with us.

## To Share or Not to Share?

Teaching our children to be cautious online, starts with open conversations.

The Federal Trade Commission has a wealth of resources for parents to start these important conversations with their children.

# PRIVACY - Wi-Fi

## Connecting to Wi-Fi at Home

Students enrolled in Citrus County Schools can safely and securely connect to their home network or Wi-Fi. Every iPad is filtered through our student safety and device management software program called Securely.

### SAFETY BEYOND FILTERING

## Safety Cloud

Our signature cloud-based web filter—combined with additional best-in-class features like nudity detection and Google Docs scanning—brings student safety to the next level.

# DIGITAL RESPONSIBILITY

## Tips for Success - Create a Plan

Student iPads are an opportunity for the entire family to participate in digital learning experiences. Together, families can proactively address pressing parenting topics such as how to have a healthy relationship with technology and positive internet usage.

It is important to create a plan with your children on when, where, why, and how children can access their iPads. Set up a charging station in a common area of the home or in the parent or guardian's bedroom to monitor nighttime limits.

- Know student passwords
- Limit screen time for entertainment usage
- Discuss appropriate use of social media and review their iPad regularly

## Talk with Your Child

Having conversations with your child about how he or she is using technology in the classroom will not only help you better understand today's learning environment, but also allow for a give and take between the two of you.

These conversations give your child an opportunity to “be the teacher,” and share what they know with you. Find resources to help create a plan and conversation starters on our website:

## Social Media

### Social Media Apps & Digital Footprints

Media and devices are an integral part of our world today. It is important to help our students learn appropriate and healthy uses of digital devices and citizenship.

Not all Social Media apps are bad. They can be used to unite a group of people to start a movement, create awareness or provide access to experts in the field. The key is to help equip our students with the skills to have a positive digital presence.

Most of that skill development comes in the form of open communication. Starting conversations about what they share, who they should connect with and what information should be shared.

**Common Sense Media** provides a wealth of information regarding children and media, including tips, setting up a family media plan, conversation starters and more.

## Screen Time

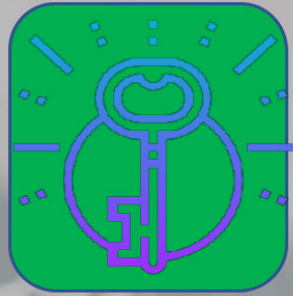

### Screen Time

Monitoring screen time can be a battle as a parent. If your child has an iPad with iOS 12, a great new feature is Screen Time. You can now quickly monitor, set limits and downtime on your child's device. If your child has an iPhone, this is also available on that device.

#### To Get Started:

1. Tap on Settings
2. Next tap on Screen Time
3. To see a daily breakdown about your child's screen time, tap on their name
4. You can also set: Downtime-scheduled time away from the screen and App Limits-set limits for specific apps

# ACCESSIBILITY

# ACCESSIBILITY

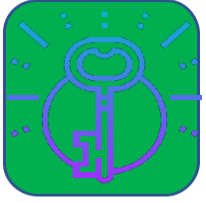

## Learning with iPad-It is Personal!

The iPad comes equipped with powerful features to complement every learner. Let's explore a few of the most powerful accessibility options

### Get Started!

1. Tap on the settings app.
2. Next, find "Accessibility".
3. Notice how all the accessibility options are organized with headings like Vision, Interaction, Hearing, etc.

# Accessibility — Vision and Speech

If you have a hard time reading text, use the Speak Selection and Speak Screen feature to read your email, web pages and books.

## Get Started

1. Tap on the settings app.
2. Next, find “Accessibility” tab.
3. Tap on Spoken Content and toggle on both Speak Selection and Speak Screen
4. Speak Selection allows you to highlight any text and have the option to speak whatever you have highlighted.
5. Speak Screen allows you to use a two-finger swipe from the top of the screen to hear the content of the screen

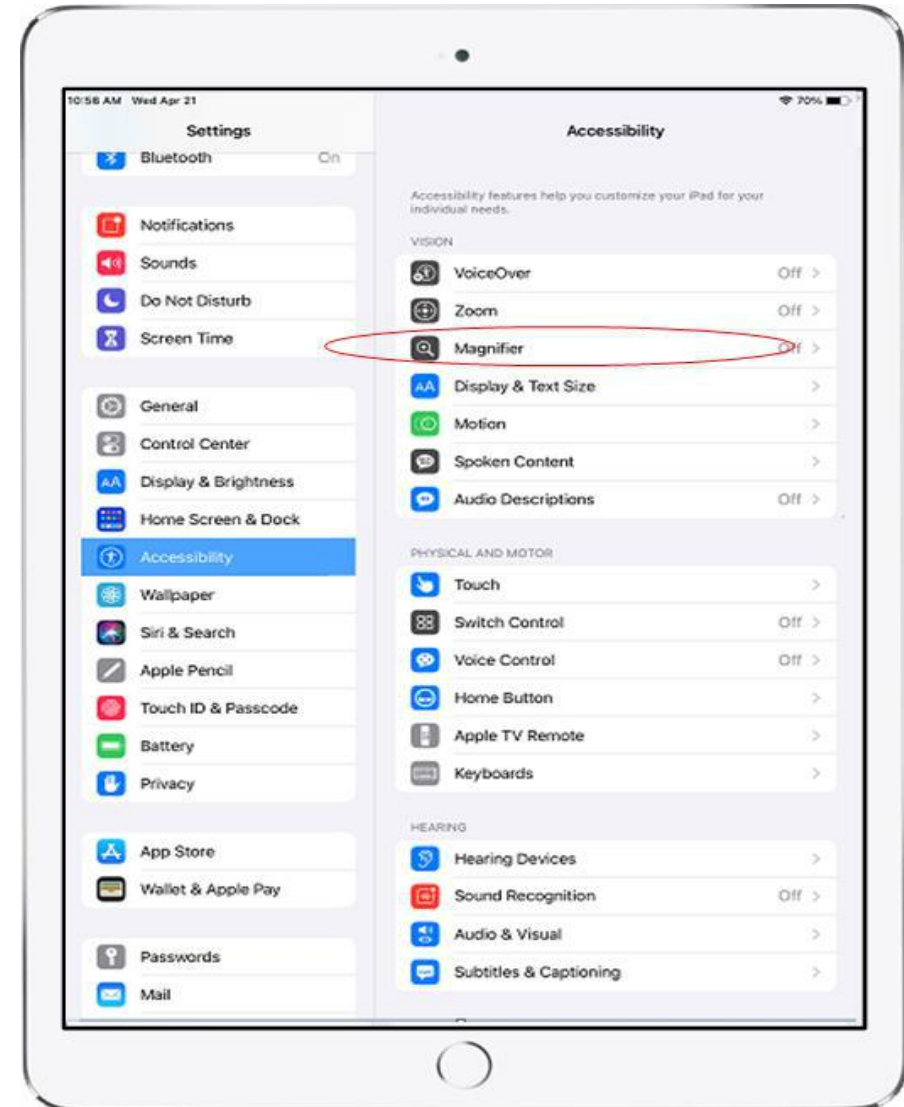

# ACCESSIBILITY

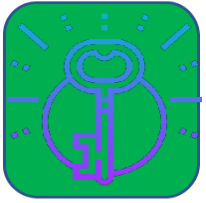

## – Vision-Magnifier

Need to zoom in on some small details?  
Use the Magnifier like a digital magnifying glass.

### Get Started!

1. Tap on the settings app.
2. Next, find “Accessibility” tab.
3. Tap on ‘Magnifier’ and toggle it on
4. Triple-click on your home button to enable the Magnifier. It uses the camera on your iPad to increase the size of anything you point it towards.
5. Use the flash to light the object, adjust filters or snap a photo to get you see details more clearly.

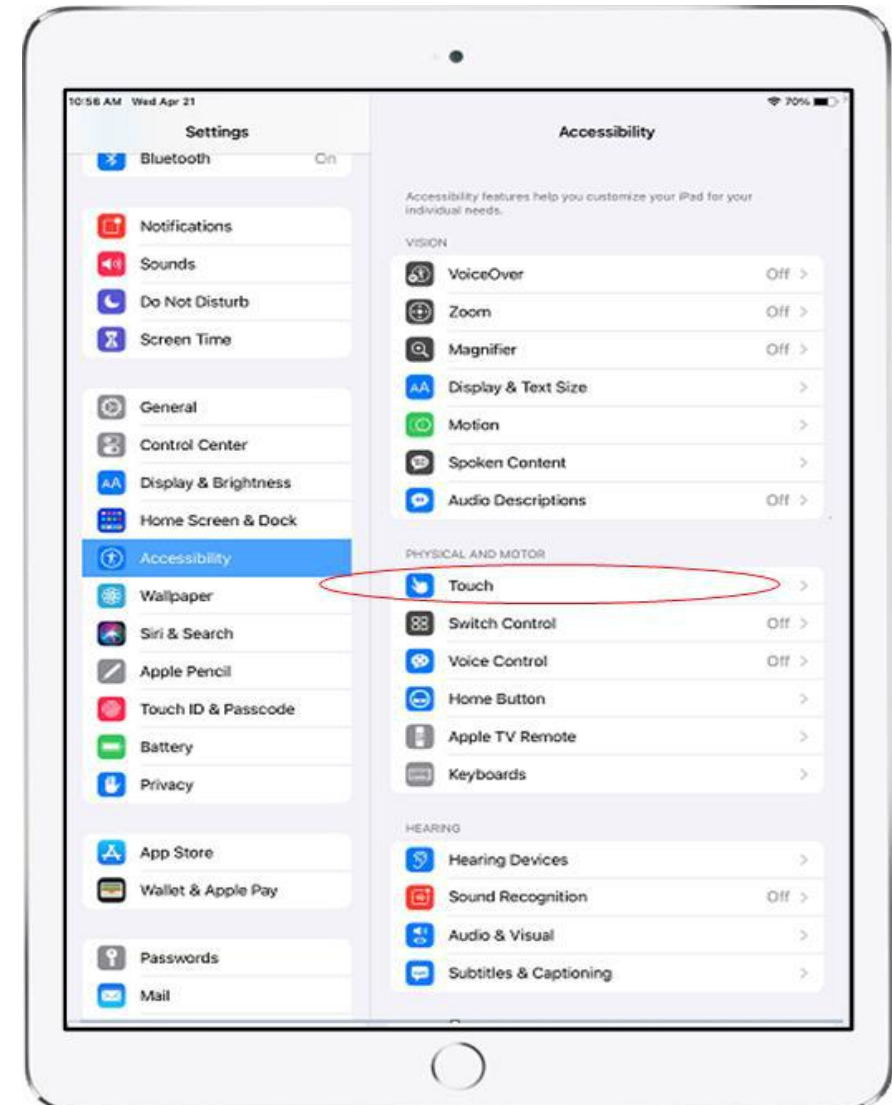

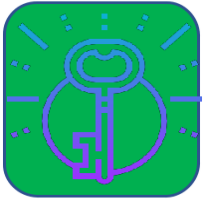

# ACCESSIBILITY - Touch

Assistive Touch allow you to adapt the multi-touch screen to your needs. Younger students often have difficulty taking a screen shot or restarting.

1. Tap on the settings app.
2. Next, find “Accessibility” tab.
3. Tap on Assistive Touch. Toggle on
4. A floating ‘home button’ should appear. Tap “Customize Top Level Menu”. Edit shortcuts.
5. Tap icon to select which feature you would like access to
6. Press the home button and try out the Assistive Touch button.

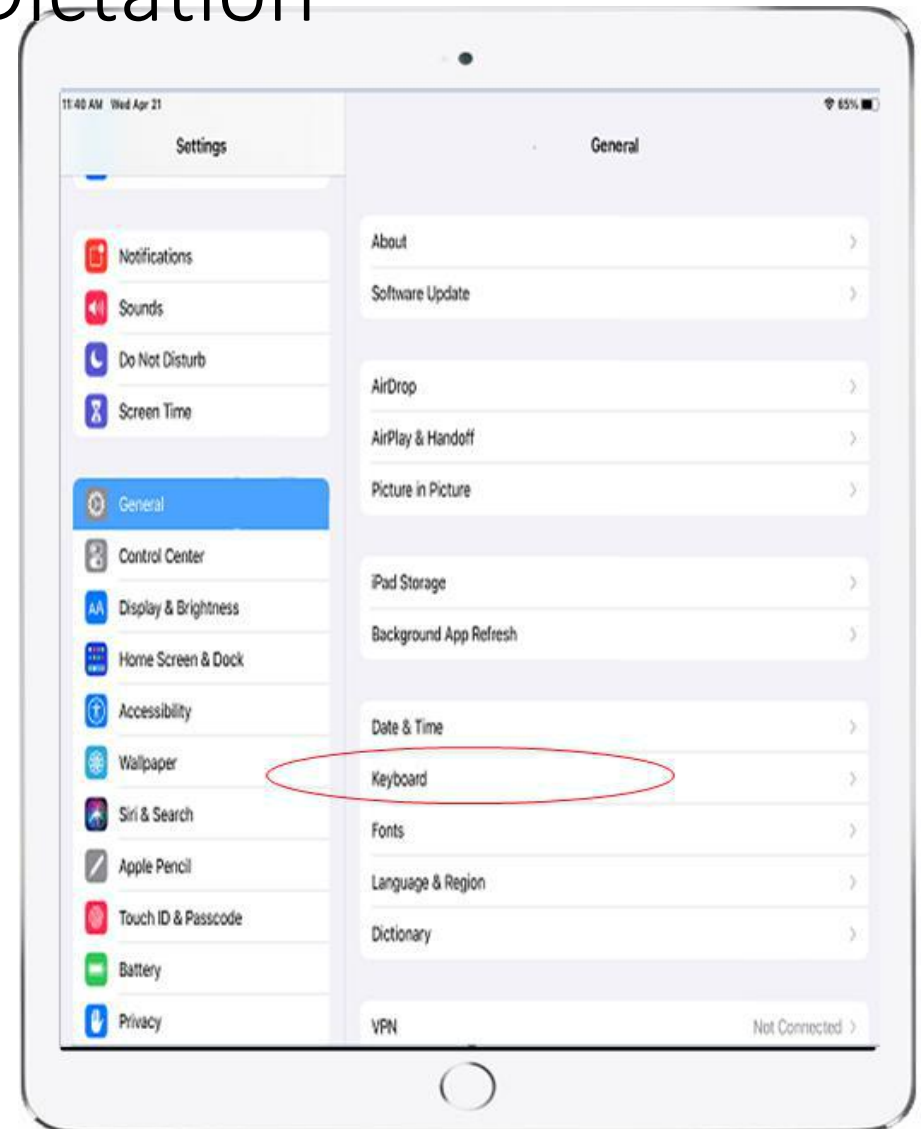

# ACCESSIBILITY – Dictation

Dictation allows you to speak whenever you would type. The microphone button will be accessible from your keyboard once it is turned on.

## To Turn on Dictation:

1. Tap on the settings app, tap on General
2. Next, tap on Keyboard
3. Toggle on Enable Dictation
4. Open the Notes App
5. Tap on the screen to bring up the keyboard. Tap on the microphone in the lower left-hand corner
6. Speak into the microphone at the top of the iPad. Watch your words turn to text

# ACCESSIBILITY – Auto Reader View

Web pages are often littered with distracting content that makes it hard for readers to concentrate. Quickly clean things up by using Automatic Reader View.

## Get Started!

1. Open a website.
2. In the left corner, click on the two AA's in the website URL.
3. Select "Website Settings".
4. Turn on "Use Reader Automatically"
